

## PM40

Oxygen monitor PM40 is designed for the low end of measuring the content of oxygen in the welding area. By measuring down to 40ppm is a perfect simple solution to ensure a perfect weld.

**Technical specifications:**

Range: Down to 40ppm  
Battery: up to 20 hours before recharging is needed  
Accuracy: +/- 5ppm  
Display: Digital  
Sensor: Thermo-electric

**Advantages:**

Battery powered  
No preheating time

**Weight:**

Instrument: 0,42 kg
